

Resume Analysis Report

File: Tayyabah_Rehman_Resume_AsappStudio (1).pdf | Resume Analyzer AI

Scores

Overall Score: 8/10

The candidate has a strong resume with a clear and concise format, showcasing their technical skills and experience in AI/ML development.

CV Standout Score: 8/10

The candidate's resume stands out due to their impressive projects and internships, demonstrating their ability to apply theoretical knowledge to real-world problems.

ATS Score: 9/10

The candidate's resume is well-optimized for ATS systems, with relevant keywords and phrases used throughout the document.

Job Match Score: 9/10

The candidate's skills and experience are highly relevant to the job description, with a strong focus on machine learning, deep learning, and computer vision.

Strengths

- Strong technical skills in AI/ML development
- Impressive projects and internships
- Clear and concise format

Weaknesses

- Limited work experience
- No clear career progression
- Some sections could be more detailed

Missing Sections

- Certifications
- Awards or recognition

Improvement Suggestions

- Add more details to the work experience section
- Include certifications or relevant courses
- Quantify achievements and impact in projects and internships
- Consider adding a summary or objective statement

Keyword Analysis

Present:

Machine learning, Deep learning, Computer vision, Python, PyTorch, TensorFlow

Missing:

Data science, Natural language processing, Cloud computing

Final Recommendation

The candidate has a strong foundation in AI/ML development and a good chance of passing ATS systems. With some minor improvements to the resume, such as adding more details to the work experience section and including certifications, the candidate can increase their chances of getting noticed by the hiring manager. Overall, the candidate is well-suited for the Associate AI/ML Developer role at Asapp Studio.
